

# ChatGPT: What's Going on in that Brain of Yours?

---

Justin Grammens – Founder + CEO

SOFTWARE DEVELOPMENT DONE RIGHT™

#OSN2023

# Outline

- About Me
- What are Large Language Models
- Hands on with GPT-2 (as a model for GPT-3)
- Explore OpenAI Tools
  - Playground
  - API
  - Plugins (time permitting)

# About Me

- Founder, **Lab651 & Recursive Awesome** – Custom Software and AI Solutions Development
- Co-founder, **Captovation** – AI powered online presentation coaching platform
- Owner, **AI Weekly News** – Publication covering AI
- Host of the “**Conversations on Applied AI Podcast**”
- Adjunct Professor, **University of Saint Thomas** – Teaching graduate courses on IoT & ML
- Co-founder, **Applied AI** – 501(c)(3) non-profit: Monthly meetups, conferences, videos and podcasts on AI/ML

# Large Language Models

- Generative mathematical models of the statistical distribution of tokens in the vast public corpus of human-generated text.
- Sentence: “The first person to walk on the Moon was”
- Really asking: Given the statistical distribution of words in the vast public corpus of (English) text, what words are most likely to follow the sequence?
- Answer: Neil Armstrong

# GPT Releases

- Version 1.0 – June 2018
  - 117 million parameters
- Version 2.0 – February 2019
  - 1.5 billion parameters
- Version 3.0 – May 2020
  - 175 billion parameters
  - 100x larger than version 2.0
- Version 4.0 – March 2023
  - 1+ trillion parameters
  - 6x larger than version 3.0

- Cloud & desktop hybrid, integrated computation platform
- Uses the Wolfram Language
- Built in algorithms, data and shared knowledge base
- Run computations locally or in the cloud
- Similar to Jupyter notebooks or Google's Colab environment
